Limited Liability Company

"Main Solution"

Kiev
2020

Limited Liability Company "Main Solution" is one of the five best companies in the agro-industrial segment of Ukraine. Main Solution LLC operates as an International Trade Agency for Agricultural Products at all sea and river ports.

Our company presents a mutually beneficial proposal for cooperation in the purchase of Ukrainian agricultural products. The entire grain group is of high quality and natural, free from genetically modified organisms, as documented by independent experts. The company's products are certified by the National Standard of Ukraine. We are members of the Ukrainian Chamber of Commerce and Industry.

LLC "Main Solution" is a part of the association of agricultural enterprises of Ukraine, which has more than 30 enterprises. The sown area of the association of agricultural enterprises is more than 500,000 hectares. Therefore, on the sown areas of our association of agricultural enterprises, the annual harvest of the entire grain group is about 15 million tons. Each enterprise fulfills its role: growing agricultural products, recycle, transport services, quality control, etc. Our company constantly confirms the status of a reliable partner and supplier, which implements the best international practices in management and quality, invests in innovation and sustainable development of communities. Our business is transparent and honest, as we realize its role in both Ukrainian and international society.

Limited Liability Company "Main Solution" provides you with an incomplete list of supplied products such as wheat, corn, barley, soybeans, rapeseed, flour (wheat, rye), vegetable oils (sunflower, soybean, rapeseed).

The advantage of Main Solution LLC is teamwork with other agricultural enterprises, which allows you to quickly collect the required amount of products of the best quality, products certified according to DSTU of Ukraine from all over our country. Thanks to this, we are able to fulfill all our obligations without hindrance.

We will be happy to consider your suggestions. LLC Main Solution will be glad to cooperate.

Soybeans

Rapeseed is one of the most widespread oilseeds in the world. The benefits of Rapeseed are undeniable. It is widely used in many areas of industry and agriculture. All parts of the plant are used, it is practically waste-free production. The main product obtained after pressing the seeds is rapeseed oil. The cake after pressing goes to livestock feed. Green matter is also an excellent food, especially in early spring.

Specification:

- moisture content no more than 15%;
- garbage impurity no more than 3%;
- oily impurity no more than 5%;
- acid number of oil in seeds not more than 5 mg KON/ g.

Soybeans are the most common in pulses and oilseeds. It is used to make butter, milk substitutes and fermented milk products, flour.

Soybeans contain almost all irreplaceable trace elements: nickel, manganese, aluminum, iodine, cobalt, molybdenum. Most of the macronutrients are magnesium, potassium, calcium, silicon, phosphorus and sulfur.

Specification: - moisture content no more than 12%;

- mass fraction of protein in terms of dry matter not less than 35%;

- mass fraction of oil not less than 12%;

- garbage and oil impurity no more than 10%.

Rapeseed

(Packing - in bulk.)

Yellow peas /halves

Peas are a grain legume with a high nutritional value. Pea seeds are easy to boil and are well absorbed by the human.

Specification:

- moisture content no more than 15%;
- grain impurity no more than 5%;
- weed impurity no more than 4%.

Packing

0.5 kg, 1 kg, 3 kg, 5 kg, 10 kg, 25 kg, 50kg.

Millet

Millet is a rich source of potassium and magnesium. Thanks to this, cereals have a positive effect on the work of the cardiovascular system, because magnesium in combination with potassium normalizes the work of the heart muscle.

Specification:

- humidity not more than 17%;
- trash admixture no more than 6%;
- grain impurity no more than 10%.

Packing

0.5 kg, 1 kg, 3 kg, 5 kg, 10 kg, 25 kg, 50 kg. In big bags too.

Walnuts are one of the most nutritious foods around.

Zinc and iodine found in walnuts are beneficial for skin, hair, nails and thyroid gland.

Specification:

- moisture content no more than 10%.

Packing

0.25 kg, 0.5 kg, 1 kg, 10 kg.

Grain fodder

FORAGE WHEAT is a grain that meets a certain quality standard, but is not suitable for use in the food industry and for sowing. Forage is the basis of food for animals and birds.

Specification:

- moisture not more than 15%;
- mass fraction of crude protein not less than 14%;
- mass fraction of crude fiber not more than 9%;
- the fat quantity is not more than 50 mg

FORAGE CORN is used to feed chickens, pigs and other animals. In addition, it can be used to feed fish while fishing. Due to its high calorie content, grain quickly saturated and promotes weight gain

Specification:

- moisture content no more than 15%;
- grain impurity no more than 13%;
- weed impurity no more than 5%.

FORAGE BARLEY is an agricultural product that is widely used for the production of feed in the livestock industry, due to the presence of many nutrients in its composition.

Specification:

- moisture content no more than 15.5%;
- weed impurity no more than 5%.

Flour

Flour is a food product obtained as a result of grinding grains of various agricultural crops, mainly cereals.

Wheat flour is a healthy food product.

Types of wheat flour:

- the highest grade
- first grade
- second grade

Specification:

- moisture content no more than 15%;
- ash content in terms of dry matter not more than 1.25%;
- raw gluten no less than 21%;
- falling number not less than 160.

Packing

0.5kg, 1kg, 3kg, 5kg, 10kg, 25kg, 50kg. In big bags too.

SUNFLOWER OIL

Sunflower oil - vegetable oil obtained from the seeds of oilseed varieties of oilseed sunflower. Sunflower oil can be refined and unrefined.

Specification: Refined sunflower oil
- acid number not more than: 0.25% in fresh produced oil, 0.6% at the end of the product shelf life;
- mass fraction of moisture and volatile substances not more than 0.1%.

Non-refined sunflower oil

- acid number not more than 4 mg KON / g;
- the content of non-fatty impurities is not more than 0.1%;
- mass fraction of moisture and volatile substances not more than 0.2%.

Packing:

1L, 3L, 5L, 10L, 20L, 50L

PASTA

Pasta contains a rich composition of minerals and vitamins. These are iron, magnesium, phosphorus, potassium, manganese and calcium, as well as vitamins B1, B2, B9, E and PP. This product is rich in fiber, promotes the elimination of toxins and heavy metal salts from the body.

Specification:

- moisture content no more than 13%;
- mass fraction of scrap (no more) from 2% to 10%, depending on the group;
- mass fraction of deformed products (no more) from 1.5% to 5%, depending on the group.

Packing

0.5 kg, 1 kg, 3 kg, 5 kg, 10 kg, 25 kg, 50 kg.

BEET SUGAR

Sugar is also used in medicine for the preparation of syrups, which serve as the basis for liquid medicines, such as cough suppressants.

Specification:

- mass fraction of sucrose not less than 99.5%;
- mass fraction of moisture no more than 0.15%;
- mass fraction of ash not more than 0.05%.

Packing

0.5 kg, 1 kg, 3 kg, 5 kg, 10 kg, 25 kg, 50 kg.

Honey

Honey is a liquid product collected and processed by bees from nectar-bearing plants. Honey has antibacterial properties. This product strengthens the immune system and relieves stress.

Specification:

- mass fraction of water not less than 70%;
- mass fraction of sucrose is not more than 6%.

Packing

0.02gr, 0.25gr, 0.5l, 1l, 3l, 5l, 10l, 20l, 50l.

Powdered milk

Powdered milk is a soluble powder obtained from normalized cow's milk by condensing and drying it.

Among the minerals that make up milk powder, there are more potassium, calcium, phosphorus, sodium, magnesium, and a smaller amount of selenium, zinc, copper, iron, manganese.

Powdered milk contains such vitamins as C, B vitamins (B1, B2, B5, B6), K and A.

Specification:

- moisture content not more than 4%;
- mass fraction of fat not less than 25%;
- the relative dissolution rate is not less than 60%;
- solubility index is not more than 0.2 cm³ of raw sediment.

Packing

0.25 kg, 0.5 kg, 1 kg, 3 kg, 5 kg, 10 kg, 25 kg
