TECHNOLOGIES

glass towel dryer

**ONYX**™

Functionality becomes stylish

# About the company

Founding my company HYBRO Technologies in 2010, I followed a guiding principle - every product should have three features: functionality, innovative design and the highest quality.

Today HYBRO Technologies is a leader in the production of energy efficient products in the green/climate change market.

Modern standards and production techniques insure the highest quality of our products.

We welcome you to discover our products.

Founder of HYBRO Technologies and  
designer of HYBRID and ONYX collections

**Ilya Lapyshev**

# Why it is unique

The ONYX towel dryer is not an evolution, it is a brand new product from HYBRO Technologies, that will change the industry and replace already familiar and standard towel dryers.

## **SAFETY**

Degree of protection: IP-44. Water resistant.

## **INSTALLATION**

Simple and fast.

## **SAVING**

Low power consumption saves your electrical usage.

## **DESIGN**

Ultra-thin. The thickness of each model is only 9 mm.

## **FUNCTION**

Bathroom heating and towel drying.

## **QUALITY**

Official warranty – 5 years. Lifetime – more than 30 years.

## Function

The main feature of the ONYX towel dryer is its drying technology, which differs from ordinary towel dryers where heat transfers through direct contact with the heater surface.

With ONYX it is different. The whole surface, of a glass panel is a source of thermal infrared waves, which produce the contactless transmission of heat, evenly and over the surface of towels, which are in front of it. At the same time the towel rails remain cool to the touch.

Convection heat flow, formed between the wall and the towel dryer provides a high level of thermal efficiency.

ONYX towel dryer combines infrared direct heating, and convection heat, and is effective for heating of a whole bathroom.

ONYX towel dryer is made of tempered glass. It provides high durability and safety. The heating element is evenly positioned between the glass and the housing in one fully sealed unit. Stainless steel is used to make the polished rails.

Total thickness of the product only is 9 mm. The ultra-slim design emphasizes the unique style, and our innovative design, makes HYBRO products instantly recognizable.

## 3 in 1

ONYX is a modern towel dryer, which allows you to perform three tasks at once:

- carefully dry your towels
- comfortably heats the bathroom
- adds style to the bathroom interior

# Model range

## ONYX 1S

Power	130 W
Width	320 mm
Height	600 mm
Thickness	9 mm
Heating area	3 m <sup>2</sup>
Weight	5 kg

## ONYX 2M

Power	280 W
Width	470 mm
Height	900 mm
Thickness	9 mm
Heating area	5 m <sup>2</sup>
Weight	11 kg

## ONYX 3L

Power	490 W
Width	620 mm
Height	1200 mm
Thickness	9 mm
Heating area	9 m <sup>2</sup>
Weight	19 kg

Voltage: 230 V | Operating frequency: 50 Hz | Degree of protection: IP44 | Front: tempered glass | Back: Metal | Color: Black / White | Infrared heating: front glass panel | Air convection: natural heat flow | Warranty: 5 years | Lifetime: 30 years

# Market analysis

Compared to 2018, the number of electric towel driers sold in 2019 increased by **25.7%**.

At the same time, the number of water heated towel driers for the same period decreased by **7.3%**.

- Electric heated towel dryer
- Water heated towel dryer

Our next innovative solution was to create a separate ONYX towel dryer for the kitchen. This will greatly expand the scope of the towel dryers in general.

With perfect quality and non-aging design, the ONYX towel dryer will be an indispensable device in modern kitchens for a long time.

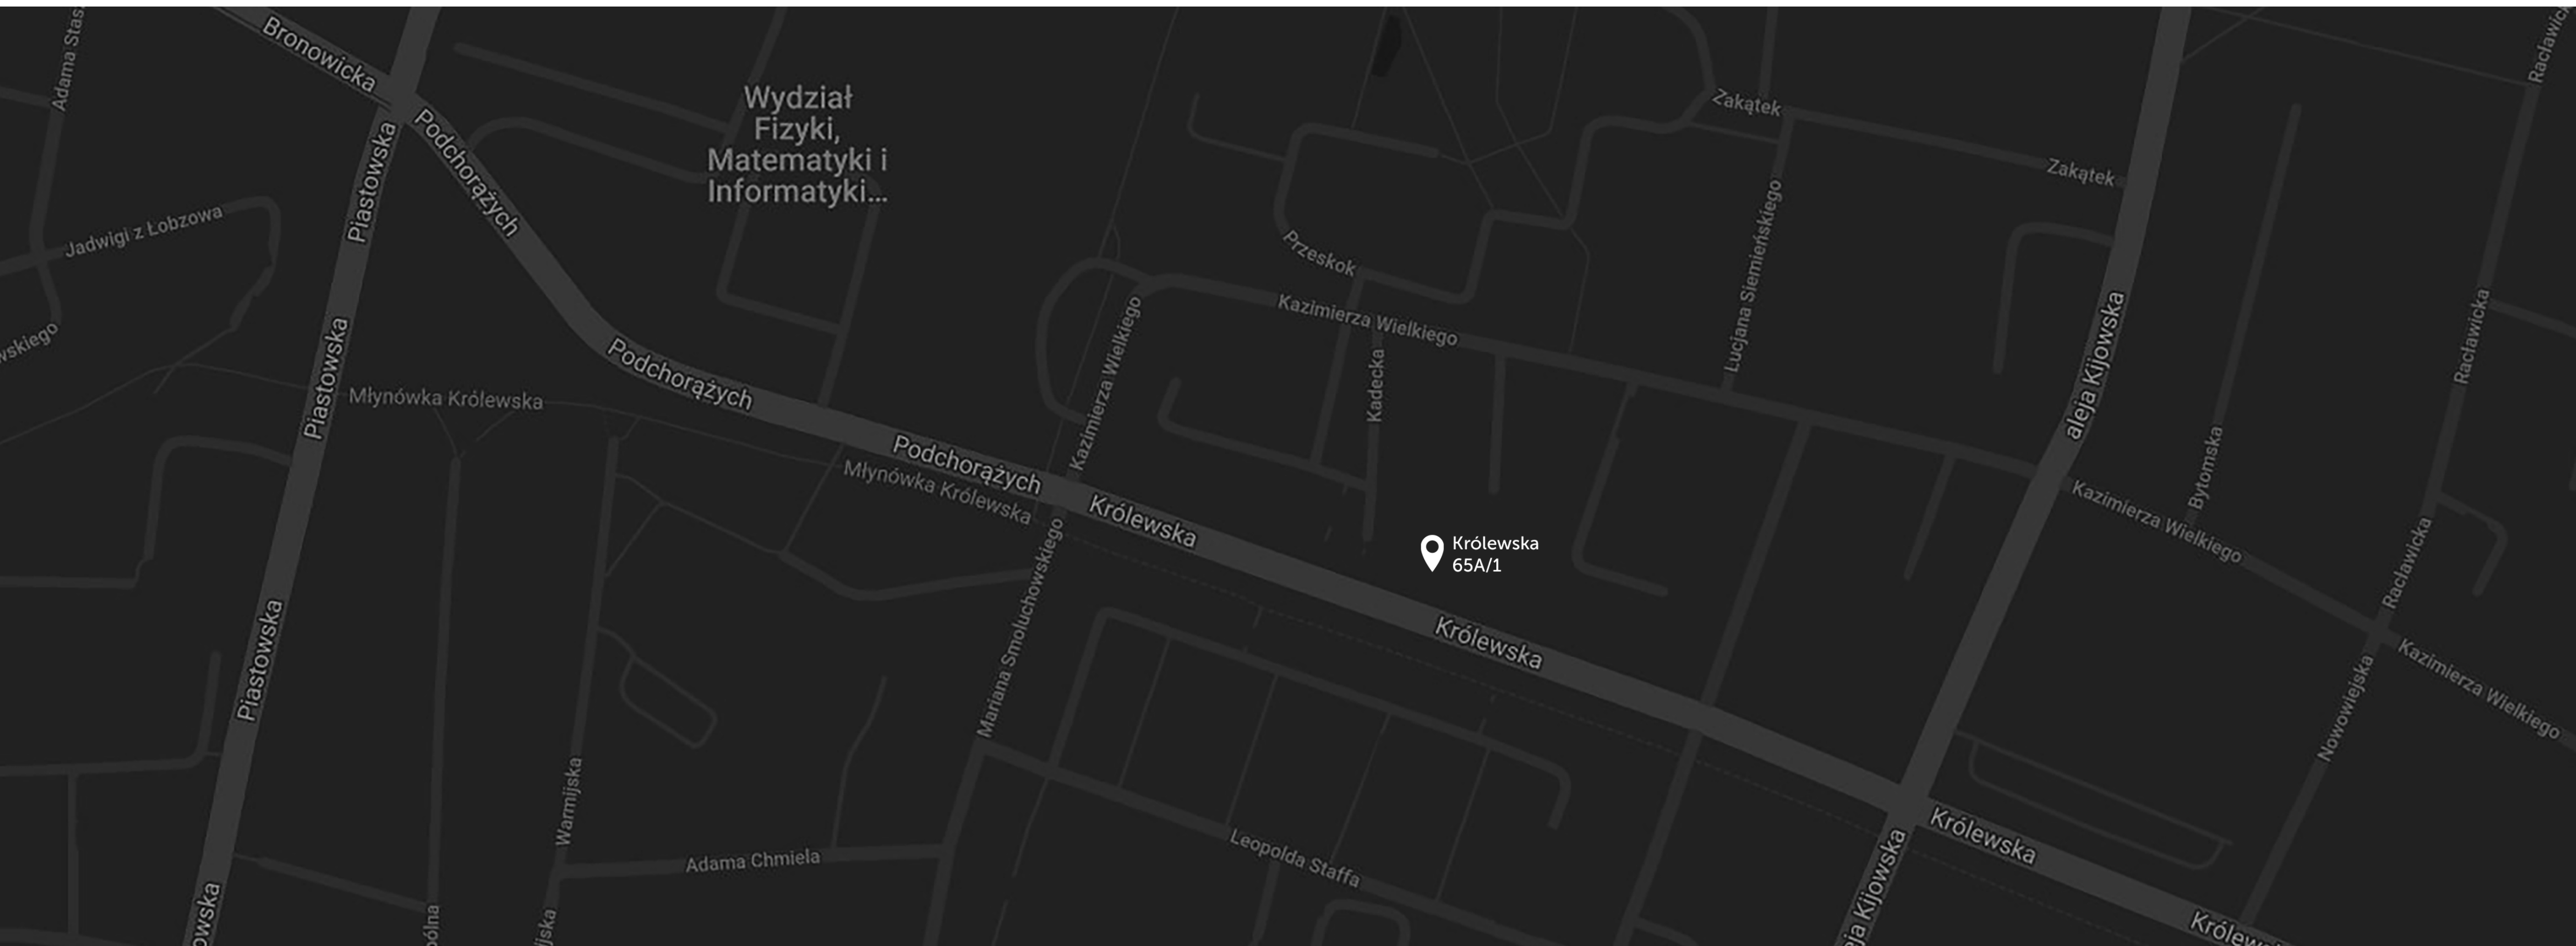

# Innovation

ONYX towel dryer is a patented product of HYBRO Technologies. Innovative ideas and solutions come together in one product.

# Feature

ONYX – is for those, who truly appreciate unique design, uncompromising function, and highest quality.
