

Ukrainian Snail LLC

Ukrainian Snail Holding

6 years of experience

- ▶ We, the Ukrainian Snail Holding are the oldest and the biggest snails farm in Ukraine with own refining facility. The farm grows and processes snails of helix aspersa family in ecologically clean area of Poltava region in Ukraine.
- ▶ The farm and refining facility are certified by HACCP and ISO-22000 certificates.

Slime and Mucin

- ▶ Slime and mucin are widely used in pharmaceutical and cosmetic production. Both consist unique components like allantoin, glycolic acid, collagen, elastin, hyaluronic acid, vitamins A, C, E and other useful components.
- ▶ We export both: slime itself and pure mucin.
- ▶ We are the only Ukrainian company having all permissions to export products from snails, including slime and mucin from Ukraine.

Snail caviar

- ▶ Snail caviar has a high nutritional value, it contains more than 36 macro- and microelements, and this, by the way, is 10 times higher than that of fish. In particular, it consists of copper, magnesium, iron, zinc, sodium, potassium. It also contains vitamins A, D, E, C and a large amount of B vitamins.
- ▶ A balanced vitamin and mineral complex improves the functions of the cardiovascular system, thyroid and gonads, increases the activity of the whole organism. In addition, snail caviar is a powerful aphrodisiac, like any other caviars.
- ▶ We produce and export fresh snail caviar in cans and freeze-dried caviar powder for pharmaceutical and production and production of sport-food, super-food and bio-supplements.

Snail meat

► The chemical composition of snails contains: choline, vitamins A, B1, B2, B5, B6, B9, B12, E, K and PP, as well as the minerals necessary for the human body: potassium, calcium, magnesium, zinc, selenium, copper and manganese, iron, nickel, phosphorus and sodium.

► Along with oysters, snails are considered a very healthy food source of high quality protein.

► We offer snail meat in different conditions:

- frozen fillet with liver or without, in vacuum;
- freeze-dried fillet with liver or without for freeze-dried soups and semifinished food;
- freeze-dried fillet powder for sport-food, super-food and bio-supplements.

Cooperation

► Asian-Ukrainian trading is growing fast, including the agricultural area. Snails and products of snails are not the exclusion, and we, as a farmer and processor are very interested in long-term cooperation with Chinese companies. From our side we guarantee quality and stability of supplies.
