UDEN-S® HEATERS - A PRODUCT WHICH EXPENSES SALES

Dear colleagues!

UDEN-UKRAINE LLC, a leading Ukrainian manufacturer of energy-saving heating systems UDEN-S®, offers a long-term cooperation related to the sale and installation of infra-red low-temperature panel heaters.

For 10 years of operation we have become leaders in the market of energy saving systems in Ukraine and we have been actively developing a dealer network abroad. For 3 years of successful operation in the European market, our products have already been represented in countries such as Germany, Austria, Italy, Great Britain, Estonia, Poland, Bulgaria, Latvia, etc.

The wide range of UDEN-S® heaters satisfies the demand of all market segments: from budget option to the present exclusivity. The equipment is installed as the main and additional heating for objects of different scale and complexity: from apartments and private houses to shopping centers, schools and medical institutions.

Our main priority is the high quality of the products, which is confirmed by certificates of compliance of the EU, the Customs Union and Ukraine.

5 "FOR" or why it is profitable to deal with us!

1. Actual business

The whole world talks about energy saving, strives for maximum use of environmentally friendly and inexpensive renewable energy sources, electric heating systems, and the state programs of all countries are aimed at energy efficiency.

2. Energy-efficient technologies

We offer you energy-efficient equipment for heating different types of rooms on the basis of non-liquid infrared heaters with a power of 100 to 700 W. Our heating technology has excellent heat-storage properties and it is presented in the form of wall, ceiling panels and plinth-type heaters. Heaters UDEN-S have a design capacity of 40% less than any convection heating devices, and in operation - in 1,5-2 times more economical. At the same time, the whole system works only 5-7 hours a day.

Heating based on UDEN-S® is fully compatible with smart home systems and can be used in conjunction with alternative energy sources.

3. Technical and consulting support

We value long-term and stable partnerships, therefore we support sales at all levels.

Our design and engineering department will help to design an optimal heating system for an object of any complexity, train your technical specialists in the installation and adjustment of equipment, and, if necessary, carry out the installation.

Our experienced designers will easily select heaters for any room (visualization in the interior of the customer) and fulfill the individual order of your client, embodying his original idea in life.

For your convenience, a personal manager will be assigned to you - you can always contact him to analyze problem situations and help in developing a step-by-step action plan.

4. High quality products

We constantly modernize production, increase capacity and improve the quality of products. Heaters are made of environmentally friendly natural materials. They maintain a healthy microclimate in the room, because they do not dry the air, do not emit combustion products and do not create a dust circulation. And this is most relevant for children's, preschool and medical institutions.

The products are certified and absolutely fireproof, the period of its continuous operation is 25 years.

Many years of experience allow us to be completely confident in our product, which is why we offer a 5-year exchange guarantee.

5. Ease of use

- Saving on delivery - cooperation of Ukraine and the EU gives preferences for goods produced in Ukraine, which ensures reduction or elimination of customs duties, which means savings in money, simplicity and reliability of delivery.

- Competitive price.

- Reliable factory packing of the goods.

- Absence of unpleasant surprises: you will be warned in advance about the price change, assortment of goods and the possible shift in the delivery time.
