

ABOUT OF COMPANY

Here is "Zernari", an Ukrainian producer and supplier of wheat flour and cereals of best grade and quality.

"Zernari" is a part of "Agrodar Ltd", which is fast developing group of companies established to 2000 in central part of Ukraine. Managing more than 15,000 hectares of carefully cultivated land, having more than 400 skilled workers on 3 certified elevators with a total capacity of 108,000 tons, and being in international trading for 15 years "Agrodar Ltd" Group is confidently taking a worthy place among the Ukrainian manufacturers and exporters.

MILLING MILL

First in independent Ukraine original Swiss -made mill by Buhler with capacity of 2 mills of 150 tons of grain per 24 hours each built in 2017 is a striking example of the greatness of technological progress in the milling industry.

Our advantages:

State of the art technologies and equipment:

- 155 years of experience and know-how of Swiss producer guarantee high and stable quality of final products
- High efficient grain-cleaning machines and using of optical grain sorter which instantly removes damaged, diseased and shriveled grains together with color defects impurities ensure ultimate grain cleaning efficiency and establish basis for quality and safety of final flour
- Automatic grain dampening system dispenses water sharply and evenly through the grains to provide successful and stable process of grain grinding
- The last generation of four- and eight-roller mills provide a stable and reliable process of grinding wheat kernels and ensure optimal level of starch damage what lead to high bakery characteristics of flour
- High-accuracy weigh dosing of gluten and microelements provide possibility to create homogenous fortified flour according to requested receipts
- Redressers and in-line control sifter assure double quality control

Maximum level of industrial food safety and sanitation standards:

- All equipment designed accordingly to high international food safety requirements
- Working surfaces of mills and spouting system are made of stainless steel
- Entolektor systems ensure 99,5% of mechanical destroy of insects and its eggs in wheat flour and semolina
- Biopolymer coat of flour storage bins excludes ferrous and concrete impurities

Multy level system of quality control:

- Control system provides full traceability of products during whole production process
- Brand new on-line quality analyzer allows to track main quality parameters of flour and baking characteristics in real time mode and efficiently correct them on time
- Laboratories of flourmills and grain storage silo are equipped with modern facilities providing guaranteed high quality control of raw materials and final products

Logistic and delivery system of high level:

- Flour outloading by using high speed conveying system
- Own railway branch line with a carrying capacity of 24 cars per day

ZERNARI

OUR PRODUCTS

Non-GMO, certified as per FSSC/ISO 22000/ISO TC 2202

Wheat flour improved quality "Select"

Wheat flour premium grade fortified with vitamins and minerals

Wheat flour premium grade

Wheat flour first grade

Wheat flour second grade

Wheat flour is dispatched as

- in bulk
- in polypropylene bags 25 and 50 kg
- in paper packages 1 kg, 2 kg and 10 kg

Semolina

Supplied in polypropylene packages of 1 kg and polypropylene/paper bags of 10, 25 and 50 kg.

Granulated wheat brans

Brans are dispatched as

- in bulk
- in polypropylene bags 25 and 50 kg and in big-bags.

CEREALS

The high quality of "Zernari" is also seen in the line of cereals (semolina, buckwheat, buckwheat flakes, wheat grits, millet, corn grits, oatmeal, oat flakes, various types of rice).

We select best grain which has an excellent taste.

Original packaging and exact weight will make your choice easy and pleasant.
